

**PARTNERING WITH OUR CUSTOMERS TO DELIVER TECHNICALLY AND TACTICALLY MERGED SECURITY SOLUTIONS MEETING REAL-WORLD THREATS.**

**PN: STL-VIR-G2**

### FEATURES

- ◆ FULL-SITE SITUATIONAL AWARENESS
- ◆ MULTIPLE ALARM STATION INTEGRATION
- ◆ OPEN SYSTEM ARCHITECTURE

### APPLICATIONS

- ◆ FIXED PERIMETERS
- ◆ EARLY-WARNING
- ◆ CRITICAL ASSET PROTECTION

### MARKETS

- ◆ NUCLEAR
- ◆ DOD
- ◆ DOE
- ◆ DHS
- ◆ CRITICAL INFRASTRUCTURE

**VIRTUS**, built on ShadowTech's Vanguard architecture, offers an integrated full-site Command Center Security solution. This Command, Control, Communicate, and Computers (C4) system offers informed decision making through real-time situational awareness in any fixed or mobile security application. **VIRTUS** presents a consolidated common operating picture. This dynamic security platform displays live video camera call up, video sequencing, pre-and-post video alarm assessment, Geo mapping, sensor integration, access control, data management, and site communications. **Virtus** can be operated by a single system specialist.

*Interactive Dynamic C4/Situational Awareness System*

*Featuring:*

**Video Capture**

**Immediate Threat Assessment (SALE Report)**

## COMMAND CENTER SECURITY SYSTEM

### **SHADOWTECH CORE COMPETENCIES**

- ◆ Security Design & Engineering
- ◆ Technology Integration
- ◆ Security Software Development
- ◆ Cyber Security Assessment & Implementation
- ◆ Tactical Consulting
- ◆ Tactical Systems Testing & Training

### **VIRTUS KEY BENEFITS:**

- ◆ Force Multiplication frees up Manpower through Enhanced Situational Awareness
- ◆ Dynamic capability ensures and increases real time situation awareness
- ◆ Allow individual to actively detect, assess, communicate and interdict threats with real time data
- ◆ Maintain existing infrastructure or establish new infrastructure
- ◆ Utilize new and existing video network infrastructure for existing, new and future camera technology
- ◆ Expandable to existing command and control
- ◆ Employ in permanent , semi-permanent and mobile applications
- ◆ Fully operational in highly harsh environments
- ◆ Built to military specification
- ◆ Provides immediate response force capabilities
- ◆ Realize cost savings in replacing existing systems

### **VIRTUS SYSTEM FEATURES:**

- ◆ TUI provides immediate detection, assessment and communication of alarm driven advance
- ◆ Enhances commanders'/users' situational awareness utilizing pre-and-post alarm event display, coupled with dynamic live video technology
- ◆ Cursor-on-target compliant
- ◆ Geo-accurate mapping displays sensor location, status, camera field of views, critical tactical data and alarm history
- ◆ Manages hundreds of live video feeds
- ◆ Flexible network technology deploys as wired, wireless or in combination
- ◆ Installs in single and redundant system configuration
- ◆ Supports primary, secondary and multiple monitoring locations
- ◆ Various monitoring devices (command center, laptop, tablet and smart phones)
- ◆ Modular and scalable
- ◆ Continuous video recording
